

Jonathan Wong

<https://www.linkedin.com/in/jonkwong/>

– Seattle, WA

Technical Program Manager with 15+ years leading enterprise-scale initiatives across cloud infrastructure and platform engineering. Proven expertise driving cross-functional programs serving 100k+ users, delivering measurable business impact through security-first approach, AI-powered automation, quick to market execution, and stakeholder alignment.

Core Competencies:

- **Cloud Infrastructure (Azure, VMs, compliance, identity, governance, resource optimization, platform engineering)**
- **Enterprise Program Strategy (DevOps, roadmapping, prioritization, user centric design, JIRA)**
- **Risk Mitigation with Data Analysis (KQL, SQL, Power BI, Splunk, Data-Driven Decision Making)**
- **Automation (Power Platform, Copilot Studio, Process Optimization, AI and agentic workflows)**
- **Cross-functional Technical Leadership & Executive Level Stakeholder Alignment**

PROFESSIONAL EXPERIENCE

Technical Program Manager, Microsoft Security Response Center - Digital Security and Resilience 08/22-10/25

Led program strategy in Azure Virtual Desktop Infrastructure with tenant isolation, defining vision and roadmap for secure cloud solutions serving global teams of 100k+ end users.

Cloud Infrastructure Program Strategy & Delivery

- Protected business continuity during nation-state cyber attack by delivering quick to market critical infrastructure deployment in 34 days through real-time prioritization and rapid roadmap adaptation with emerging threats.
- Enabled secure compliant operations for Executive, C-suite, SOC, Federal, Membership, and Education teams by delivering 6 isolated Virtual Desktop Infrastructure tenants through scalable multi-tenant architecture design.
- Enabled remote work for 108k users while ensuring EU data residency compliance by launching Azure Virtual Desktops across three European business operations with full adoption and product lifecycle management.
- Created infrastructure governance while maintaining administrative role flexibility by developing policy enforcement capabilities through Remove Server Administration Tools (RSAT) and Group Policy management.

Program Execution & Leadership

- Drove cross-organizational alignment on program priorities through weekly OKR reviews with VP-level leadership and 300+ stakeholders tracking roadmaps, feature priorities, Service Level Agreements (SLAs), and KPIs.
- Maintained a 85% customer satisfaction across diverse user segments by gathering continuous feedback to inform program iterations and feature enhancements.
- Improved platform usability by 20% and ensured engineering requirements alignment by conducting deepdive reviews with SREs and infrastructure engineers across all releases.

Infrastructure Automation & Process Optimization

- Reduced manual approval and deployments by 65% by automating infrastructure build requests through Copilot Studio and Power Platform implementation expediting new user onboarding by 3 days.
- Improved enterprise security posture by remediating 323 non-compliant legacy devices through building 4 automated compliance verification workflows across 100+ groups using Kusto Query Language (KQL) and SQL.
- Established a unified intake and governance framework enabling self-service provisioning and feature requests while maintaining quality, compliance, and operational consistency.

Senior Consultant, Avenue In Consulting

Technical Program Manager, Microsoft Fast Track Modern Work Partner Experience Data & Tools 07/20 - 02/22

Led DevOps and automation programs to drive growth for a \$61M incentive business, coordinating with multinational teams on cloud-native application development and platform engineering using Azure and Power Platform.

- Increased processing capacity by 30% and eliminated legacy manual processes by launching 9 Power Apps and 30+ automation products across 3 portals through intuitive user experience design.
- Reduced lead times by 53% implementing a quick to market development methodology, prioritizing high-impact features and iterative releases with continuous discovery with leadership to validate product-market fit.

- Enabled seamless platform integration across 19 cross-functional teams by translating ambiguous requirements into actionable roadmaps through qualitative user research, feasibility analysis, and dependency resolution.
- Architected cloud data structure, security, and taxonomy using 3 Azure Data Factory pipelines and 12 APIs, automating real-time data transformation and business intelligence.
- Designed identity access management features for 27 Azure Active Directory Groups, creating seamless authentication experiences for multinational users.
- Established a central cloud platform governance framework used by 200 internal employees across 17 wikis, 3 dashboards, 13 repositories, and 4 data pipelines, ensuring scalability and maintainability.

Senior Systems Analyst Lead, Collabera

Technical Product Manager, SPC Delivery Starbucks Retail Platform Engineering

05/19 – 07/20

Launch UberEats program to 5,496 Starbucks stores across North America delivering an increase of 4.1M in revenue.

Architect Customer Relationship Management (CRM) queues, PagerDuty alerting, Power BI, Splunk dashboarding.

- Aligned delivery vision by coordinating Kanban projects end to end across UberEats and Microsoft Azure teams.
- Reduced critical Azure service issue resolution time by 15% triaging first response for 2 different product lines.
- Improved service center operations by 5% with data analysis on operational, volume, and escalation trends.
- Reduced delivery support queues by 95% by building knowledge base and training with Confluence and GitHub.
- Aligned national release management across 6 different teams with weekly business reviews with leadership.
- Reopened 500+ stores affected by pandemic removing roadblocks and creating store delivery systems as BCDR.

Senior Consultant, Unify Consulting

Business Analyst, Microsoft Azure Marketplace

03/17 – 12/18

Evolve DevOps support program for all Azure Marketplace cloud products and apps from troubleshooting operational issues, deployments, and customer sales and billing issues. Develop GitHub documentation and Power BI dashboards.

- Plan data source strategies for on-demand reporting discussing technical tradeoffs in data architecture.
- Drive data governance and KPI for various ticketing, technical support initiatives with Dynamics CRM/PRM.
- Provide DevOps performance data visualization solutions with Power BI and SQL Server for 3 teams.
- Reduce time to resolution by 60% through root cause analysis, research, documentation, lean implementation.
- Ensure successful end to end relationships with 2,000+ Azure publishers and their customer experience.
- Self motivated to build Kanban and data frameworks to align the team and communicate project specifications.

IT Consultant, Tata Consultancy Services - Clients: Various

Program Manager, Microsoft Incentives

01/15 – 03/17

Validate co-op marketing initiatives across all global Microsoft Partner Network vendors from advertising to tech expos.

Maintain business operations fostering relationships with vendors and stakeholders throughout each campaign lifecycle.

- Gather requirements, develop operational processes, and implement KPIs across 8 programs.
- Lead team of 6 managers and 16 processors on marketing validation across Windows, Xbox, MSN, and Bing.
- Implement improvements and project plans across teams and reduce SLA by 70% setting new benchmarks.
- Streamline YOY volume by 20% as owner of 2 core incentive programs communicating with 60+ partners.
- Align strategic initiatives to stakeholders as SME with key metrics to support business growth.

EDUCATION

University of Illinois - Bachelor of Science in Management, Bachelor of Science in Marketing

Microsoft Azure Fundamentals - Azure CLI, Common Data Service, Dataverse, COSMOS, VM Scalability, IaaS, PaaS, SaaS, Power Automate, Power Apps, Power Apps Portals, Power BI, Azure Data Factory, Azure Portal

Code Fellows - Web Development, Object oriented programming, Git, Heroku, Responsive design, HTML, CSS, JavaScript, jQuery, React, MVC

Salesforce Trailhead - Salesforce Developer
